"I've always been a big RPG fan, and I've spent a good amount of time on the Persona series. There was just something that struck a chord with me about the character designs and story of Persona 5. As a result I really want to have a different perspective on the game and try a new thing," says Masashi Yamagami, lead game designer of the newly announced Game's 2nd Shelter. "This time the theme is Archeology, and the goal is to combine the RPGs and the action genre into one.

(Nicked)Q: Code Formatting With Indentation Different Than \Indent I have an assignment to write code to implement a stack in my textbook by reading in and outputting a number of elements, keeping track of their position in the stack. It's fine, except I keep getting several errors with Code Formatting With Indentation Different Than \Indent which may be in my keyword list but I don't think so. This is the code I have so far. It's probably pretty basic and self-explanatory, but since I'm unfamiliar with LaTeX it's difficult to know which of my mistakes it's pointing to. I'm also just learning LaTeX, so please bear with the lack of knowledge. Also I know LaTeX isn't supposed to look like normal text, but for the purpose of my assignment, I want it to be in italicized regular text.
