We seem to be living in a time of new standards for sex education in the public arena. What this means in practice is that sex education is in the process of being turned from one where abstinence is the dominant message and into a more contemporary, multipronged learning model. Today, as an educational topic, sex education does not have one blanket approach to how it is taught. Most schools now offer sex education as a generic topic that does not have a specific focus. Sex education is required to be taught in grades K-12, and it is a topic of increasing controversy, particularly in the US. The American Association of Sex Educators, Counselors, and Therapists released a statement in 2008 calling for more discussion on this topic and for abstinence-only groups to refrain from pushing “abstinence only” as a means to abstinence in curriculum. However, if you look at the research, the available studies have shown that when sex education is taught in a multipronged approach with an emphasis on abstinence, there is a positive impact in changes in attitudes, self-efficacy, safer sex behavior, and pregnancy rates. For more on this, see my paper, “‘Abstinence Only’ in Sex Education: What Do We Know and What Can We Learn from the Evidence?” First published in the Journal of Adolescent Health. One area where sex education is often described is in terms of a multipronged approach, with emphasis on abstinence as one of the multiple approaches. In this case, sex education is designed to prevent sexual activity and, in turn, the consequent risks that may be linked to sexual activity. While there are other approaches that include the multipronged approach, it is important to remember that, in this article, I am referring to a type of sex education that is designed for young people in grades 9-12 and encourages abstinence. As an example, the national guidelines for sex education in the US state that the following approaches are acceptable in sex education programs: Teaching abstinence; Teaching 3da54e8ca3
