
Spat 6.0 7 [EXCLUSIVE] Full Version!

The "full software" SKU, which was more expensive but could be installed on computers with no or no suitable operating system, was discontinued. All computers are now able to connect to the Internet and receive software updates. However, since software updates are free, it's a very common practice to get updates for non-software hardware, such as printer software. This is not a good idea as all the hardware you pay for needs to be updated so you can't just skip this part.
