A prominent feature of the AutoCAD system is its ability to import and export 2D and 3D DWF (drawing) files and DXF (drawing) files for presentation on the Computer Aided Design/Drafting (CAD) Graphics System (AutoCAD LT, AutoCAD Professional, AutoCAD Web Browser, or AutoCAD LT Web Browser). It also allows for the creation of DWF files and DXF files, the latter using the Interchange file format, to be exported from AutoCAD and displayed by other CAD systems, including AutoCAD LT. In addition to being available as a standalone product, AutoCAD can be bundled with Autodesk's other CAD applications, such as AutoCAD Mechanical, AutoCAD Electrical, AutoCAD Electrical. and AutoCAD Civil, also from Autodesk. Autodesk has published several editions of AutoCAD and AutoCAD LT since its introduction. AutoCAD 2004 was released in 2004; AutoCAD LT 2009 and AutoCAD LT 2012 followed in 2009 and 2012, respectively. Historical timeline AutoCAD was first released in December 1982 as a desktop application on the HP-UX operating system. The first release to support a microcomputer with an internal graphics controller was AutoCAD 1985, a 90MHz microprocessor with the HP-UX operating system and Atari 2D graphics accelerator. Later releases included Macintosh portability and support for minicomputers with VGA graphics cards. The introduction of computer-aided design in 1983 created a need for an improved, more stable, faster and user-friendly version of AutoCAD. The first full release on the S-100 bus was in 1983. During the period of 1985-1986, work was done to port the AutoCAD system to the Hewlett-Packard (HP) and Digital Research (DRI) PDP-11 (PDP-11) operating systems and the NCR (NCR) Star computer. The first full release on a microcomputer with an internal graphics controller was AutoCAD 1989, released in May 1989 for the Apple Macintosh. In 1990, AutoCAD System Release 1 (ASR1) replaced the 'B' release and changed the name of the product to AutoCAD. The first release to support Windows NT and OS/2 was AutoCAD System Release 2 (ASR2) in 1991. AutoCAD was also the

The price of copper for delivery on March 21 rose to the highest level since February 2011 on Friday as Chinese government data indicated that the nation's money supply increased to $514.1 billion in February from $508.9 billion in January. "We're a little bit higher and momentum's gaining steam," said Bart Melek, who manages money for the iShares Russell 1000 Trust U.S. Large-Cap Fund . "Copper has had a nice run,

and for the most part you need to be in stocks to buy it." Copper for delivery at the London Metal Exchange has gained 8.5 percent this year. It has risen 10 percent in the last 12 months. That's the second-largest gain among the 15 most active industrial metals, trailing only tin, according to data compiled by Bloomberg. Titanium rose 1.3 percent and nickel advanced 1.2 percent. Silver for immediate delivery rose 1.8 percent to $16.85 a troy ounce. As a result of the rally in the metal, exchange-traded funds tied to the price have risen to the highest levels since early 2009. The iShares FTSE/XBRL 300 ETF (NYSE: IYZ), the top performer, has gained 1.7 percent in the year to date, compared with a 13.5 percent advance for the Standard & Poor's 500 Index.
